

ONM-PLC 550 COLD PRESS OIL MACHINE

ONM-PLC 550 Cold Press Oil Machine is an oil machine designed for professional purpose oil production. You can make the whole control over the digital screen, as well as instant oil - pulp tracking, instant oil temperature value and humidity analysis. With its heat-treated stainless steel structure, it is suitable for long-term working conditions. It fulfills the food production codex and organic production requirements with its certified stainless steel parts. It can generate uninterrupted power for a long time at low speeds with additional engine and panel cooling. Depending on the structure of all oil seeds, it extracts oil at the lowest temperatures. Onmak family will be always with you and our machine during the creating of the recipe for each seed that you will just start producing.

Working Principle:	Screw Press (Cold press)
External Dimensions:	355*1040*600 mm
Main Engine:	2,2 kw
Power Production:	Helical geared 3 Stage reducer
Heating Power:	500 W (thermostat controlled)
Weight:	120 KG
Capacity:	1-20 kg oil seeds per hour (varies depending on seed density and hardness)
Speed:	0 - 40 rpm
Total Power:	2,5 kw 220 W 50 hz
